PROJECTS

Real-Time Data Engineering Pipeline | Python, Apache Kafka, PySpark, PostgreSQL, Apache Airflow, Docker | 2026 –

Built an end-to-end real-time data pipeline to ingest streaming data through Apache Kafka and process incoming events using PySpark.

- Developed data transformation and validation workflows before loading structured datasets into PostgreSQL for analytical querying and downstream processing.
- Orchestrated pipeline workflows using Apache Airflow and containerized Kafka, Spark, PostgreSQL, and Airflow services using Docker Compose.

Sales Data Warehouse & ELT Pipeline | Python, SQL, Snowflake, dbt, Apache Airflow, Docker | 2026

- Designed and implemented an ELT pipeline to ingest customer, product, order, and sales datasets into a cloud-based Snowflake data warehouse.
- Developed SQL/dbt transformation models and dimensional data marts to convert raw data into analytics-ready datasets for reporting.
- Automated data workflows using Apache Airflow and containerized the development environment with Docker for reproducible pipeline execution.

ETL Data Pipeline & SQL Analytics | Python, Pandas, PostgreSQL, SQL, Apache Airflow | 2026

- Built an automated ETL pipeline to extract raw datasets, perform data cleaning and transformation using Python and Pandas, and load processed data into PostgreSQL.
- Implemented complex SQL queries using joins, CTEs, subqueries, aggregations, and window functions to generate analytical insights.
- Created reusable data-processing workflows with validation checks and Airflow scheduling to automate pipeline execution and improve data reliability.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL, MongoDB, DBMS, Database Design, REST APIs.

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing.

Data Engineering: ETL Fundamentals, Data Transformation, Data Validation, Data Pipelines.

Tools & Cloud: Git, GitHub, Linux, AWS, Azure, Jupyter Notebook, Google Colab, Conda, Power BI.

Machine Learning & AI: Scikit-learn, Supervised Learning, Unsupervised Learning, Model Evaluation, Neural Networks, LLMs, RAG.

EDUCATION & CERTIFICATION

Vishwakarma University Pune, Maharashtra

Bachelor of Technology – Computer Science and Engineering

Aug 2022 – May 2026

- Relevant Coursework: Database Management Systems (DBMS), Cloud Computing, Operating Systems, Machine Learning Fundamentals.

- **Databricks Fundamentals Accreditation** — Databricks
- **SQL (Basic) Skill Certification** — HackerRank
- **Data Fundamentals** — IBM SkillsBuild
- **Oracle Cloud Infrastructure Foundation Certification** — Oracle

ACHIEVEMENTS & EXTRACURRICULARS

- **Smart India Hackathon 2025** – Cleared the first round as part of a university team by proposing a technology-driven solution to real-world problem.
- **Research Paper** – Presented “AI-Based Admission & Placement Systems” at the 14th National Conference, AIMS Baramati (2024).
- **Capstone Seminar** – Presented “Enhancing College Reputation through Personalized Admissions Using BI” with a Power BI-based analytics solution.
